Try to INVEST in not needing a Definition of Ready!

@jordanngross

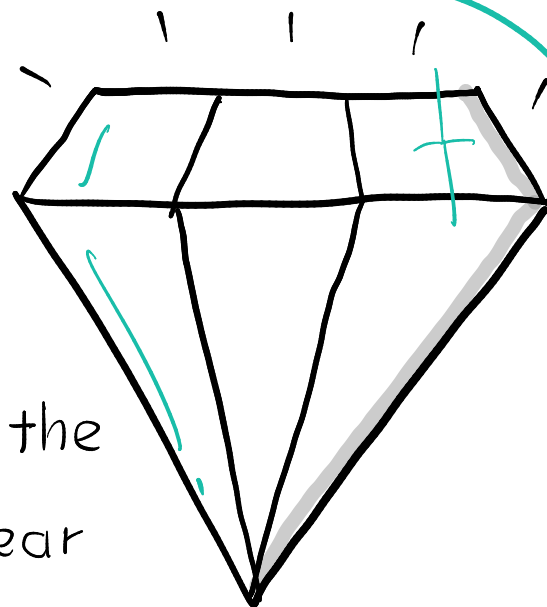

Independent > can work deliver value by itself and are dependencies known

I
N

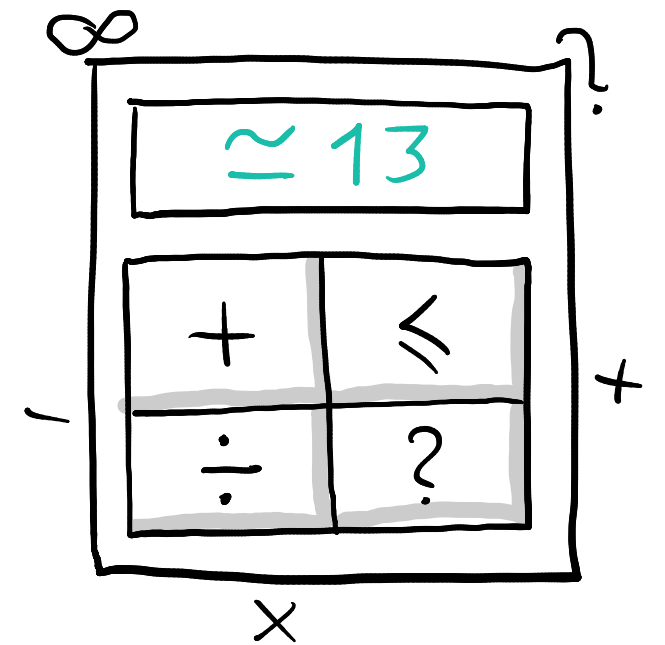

Negotiable > are the 'What' and 'Why' clear, but is the 'How' still open for discussion

Valuable > is the value to be delivered to the stakeholders clear

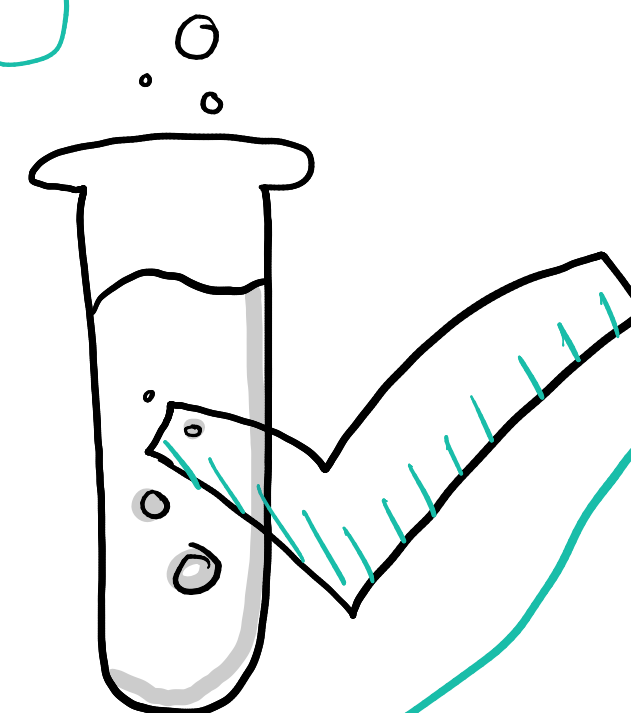

V
E

Estimable > do we have any idea on the complexity and effort of the work

S
T

Small > is it possible to plan the work with a decent level of certainty

Testable > can we test if the delivered work fulfills the acceptance criteria set with the goal
